D-CREATIONS

Daniel Madac ·Sole trader (micro-entrepreneur) ·SIREN 988 794 582

I build products that work: iOS & Mac apps, hardware prototypes, AI automation.

Montpellier, France ·contact@dcreations.fr ·+33 6 95 91 36 09 ·linkedin.com/in/daniel-madac-3694091bb ·github.com/D-Creates ·dcreations.fr

D-CREATIONS helps businesses in Montpellier get found, save time and earn good reviews: photos and video, websites and AI automation, by one person working with an AI team.

SERVICES

Photos & Google profile 490 EUR
10 professional photos and your Google Business profile cleaned up, so customers find you and like what they see.

One-page website 990 EUR
A fast page with your menu or services, map, opening hours and booking or contact, in French and English.

Reviews & time-saver 149 EUR / month
Every customer is invited to leave a review, AI drafts the replies you approve, one routine task is automated, and you get a monthly report.

AI assistant or automation 1 490 EUR
An AI assistant or workflow connecting up to 3 of your tools (bookings, emails, reviews, invoices), tested, with a guide and 1 hour of training. You approve anything sent to your customers.

Free 30-minute check: three ideas for your business, no commitment. Honest reviews only (never fake or paid), and your customers' data stays private.

Apps for iPhone, iPad and Mac
From idea to App Store: prototype, design, build, publish and maintain your app.

Prototyping and FabLab
3D printing, laser cutting, CNC files and small series; training for your team.

AI automation
Assistants and workflows that save your small business hours each week, private by default, checked by a human.

Photo and video
Portraits, events, weddings and brand videos. From 500 EUR per shoot, 100 EUR per hour on site; editing and colour grading included in the quote.

Web development
Fast websites and web apps for craftsmen, shops, restaurants and start-ups: design, build, hosting, forms and online payment.

AI-assisted engineering (Claude Code, Codex, skills)
I set up Claude Code, Codex and Gemini for your team: shared rules, skills, MCP servers, review steps and usage limits, so AI writes code you can trust.

PROJECTS

CineBuddy ·**Live on the App Store (France)**
Find a verified adult to go to the cinema with, in France. Swift, SwiftUI, Supabase

Prototypes from the FabLab ·**Case study**
Fire-retardant museum models in PETG and carbon fibre, eyewear parts, laser-cut boards and aluminium panels for start-ups and makers. Fusion 360, Bambu Lab, Trotec, CNC

My AI team ·**Case study**
A WhatsApp agent that takes a task, plans it and hands it to several coding agents, with usage limits, reviews and my approval before anything goes out. Claude Code, Codex, Gemini, Qwen (local), Python

DotWorld ·**Live on the web**
The world drawn entirely as dots on a globe, built for OLED screens, with daily news per country. WebGL2, MapLibre, GitHub Actions
