Daniel Madac

AI-assisted software engineer (Claude Code, Codex)

I build products that work: iOS & Mac apps, hardware prototypes, AI automation.

Montpellier, France · contact@dcreations.fr · +33 6 52 14 63 17 · linkedin.com/in/daniel-madac-3694091bb · github.com/fablab503-collab · dcreations.fr

I build software with AI agents as a team (Claude Code, Codex, Gemini, local models), with my own skills, MCP servers and review steps, and I know where they fail and how to check them.

PROJECTS

AI engineering toolkit · 12 skills open source — github.com/fablab503-collab/daniel-brain
A library of 2,400+ procedural skills that AI agents search instead of loading, an MCP server to serve it, 18 Claude Code plugins, and 12 skills published on GitHub. Claude Code, Codex, MCP, Python, TypeScript

My AI team · Case study
A WhatsApp agent that takes a task, plans it and hands it to several coding agents, with usage limits, reviews and my approval before anything goes out. Claude Code, Codex, Gemini, Qwen (local), Python

YouTube Zeus · Open source (MIT) — github.com/fablab503-collab/youtube-zeus
Turns YouTube videos and channels into organised Markdown notes, with local AI summaries and an MCP server. Swift, Whisper, Ollama, MCP

More projects: CineBuddy · Bouclier · Phoenix Display · DotWorld · VeloTrack · Prototypes from the FabLab · Cinema 101 (colour grading, iPhone/iPad/Mac, in development) · Majordome (on-device AI assistant, beta) · Atlas Terminal (Mac terminal + iPhone remote) · daniel-brain (12 open-source Claude Code skills) · Local video AI toolkit · QuickTime Play (Mac)

GITHUB

github.com/fablab503-collab · 10 public repositories, 34 in total (Oct 2026) · 150+ public commits since Sept 2025 · CI with GitHub Actions: daily news build for DotWorld, Android builds for VeloTrack · Open-source licences (MIT) on YouTube Zeus and fablab-tools

EXPERIENCE

Founder, digital studio: media, websites, AI automation · D-CREATIONS, Montpellier / remote — Aug 2025 - today

- Built my own AI engineering toolkit: 2,400+ agent skills with a search server (MCP), 18 Claude Code plugins, 12 skills open-sourced on GitHub.
- Built a private AI team: a WhatsApp agent that takes tasks, plans them and hands them to coding agents (Claude, Codex, Gemini, local Qwen models), with usage limits and human approval.
- Built native Mac apps: Phoenix Display (second screen over HEVC, 5K), YouTube Zeus (open source, local AI, MCP server), Atlas Terminal.

FabLab Manager, Photonic FabLab 503 · Institut d'Optique Graduate School, Palaiseau (Paris-Saclay) — Jan 2025 - Jun 2026
CDI de projet-missions; joined Sept 2024 on a short contract

- Built free tools for the lab and published them as open source (fablab-tools on GitHub).
- Coached 2 cohorts of engineering students (FIE) and 10 hosted start-ups from idea to working prototype.
- Ran the lab and its machines: Bambu Lab 3D printers (PLA, PLA-CF, PETG HF, TPU, PAHT-CF), Trotec laser, wood and aluminium CNC, photo studio.

The contract was tied to the 503 innovation project and ended in June 2026 when the university stopped funding it.

Other experience: Restaurant extra, Hotel Mercure Massy (2024) · Operator, RU 1000 track renewal train, Swietelsky (2019 - 2020) · Waiter, then manager, La Dolce Vita (Apr 2016 - Aug 2023) · Freelance web designer and IT, Independent / Recycledwelt (2018 - 2025) · Short-let host, My parents' apartment (2017 - today) · Waiter at Admiral, Knittelfeld (2014-2015) and Mrast, Zeltweg (2015-2016), logistics in Birmingham (2014), renovation in Rome

SKILLS

AI: Claude Code (skills, plugins, hooks, MCP), Codex CLI, Gemini / Antigravity, Multi-agent workflows with review steps, Local models (Qwen, Gemma, Whisper)
Software: Swift / SwiftUI, Xcode, TestFlight, App Store Connect, Kotlin / Android, Python, JavaScript, TypeScript, React, Astro, Tailwind, Supabase, Git, GitHub Actions
Prototyping: Fusion 360 (CAD/CAM), Bambu Lab 3D printing, Trotec laser, CNC wood & aluminium, Arduino, Raspberry Pi

LANGUAGES

Italian – native · Romanian – native · English – C1 · German – B2 · French – B1 (DELF in preparation) · Spanish – A2

EDUCATION

ITI G. Lattanzio, Rome: computing and telecommunications, 3 of 5 years completed (no diploma) — 2010 - 2013
Self-taught: Coursera, LinkedIn Learning (certificate: Generative AI for communication, Dec 2025), documentation and practice — 2015 - today
